SKILLS

TECHNICAL SKILLS
- Back-end: Java (Spring Boot)
- Front-end: HTML, CSS, JavaScript, ReactJS
- Database: SQL, MySQL, MongoDB
- Others: GitHub, Postman

SOFT SKILLS
- Strong communication skills: Able to clearly and concisely convey ideas and work-related content
- Self-motivated and curious: Always eager to learn and explore new knowledge and technologies
- Effective problem-solving: Able to analyze and address technical challenges efficiently

CAREER OBJECTIVE

As a final-year student majoring in Information Technology, I am seeking an internship opportunity at a tech company where I can apply the knowledge I have gained into real-world practice. I hope to learn more about the software development process, enhance my programming skills, and contribute to real projects. With a strong passion for technology, I am looking for a dynamic and creative working environment where I can not only develop myself but also contribute to the overall success of the team.

EDUCATION

FACULTY OF INFORMATION TECHNOLOGY   2021 - 2025

Ho Chi Minh City University of Technology and Education

GPA (up to now):
- Cumulative GPA (Scale 10): 7.95 – Good
- Cumulative GPA (Scale 4): 3.27 – Good

PROJECT

FULL-STACK DEVELOPER

E-COMMERCE WEBSITE – TECH PRODUCT BUSINESS   8/2024 - 12/2024

Instructor: MSc. Nguyễn Minh Đạo

Team Size :   2

Technologies Used:

HTML5/ CSS3, JavaScript, ReactJS, Java (Spring Boot), MongoDB

Role & Responsibilities:

Backend Developer:
- **Designed and implemented RESTful APIs:** Responsible for developing APIs to support key e-commerce functions such as product management, shopping cart, user registration/login, order processing, and payment.
- **Developed core feature APIs:** Enabled communication between frontend and backend for tasks like retrieving product lists and details, managing the cart, handling orders, and payment processing. Also built APIs for product search and filtering based on categories, price, popularity, etc.
- Integrated MongoDB for efficient CRUD operations on users, products, and orders.

Frontend Developer:
- Designed responsive UI using HTML5, CSS3, and JavaScript for key pages like homepage, product listings, cart, and checkout.
- **Built UI with ReactJS:** Developed dynamic user interfaces using ReactJS, ensuring reusability of components and effective state management.
- Integrated APIs into UI: Connected frontend with backend APIs to fetch and display data such as product listings, product details, cart management, and order updates.

Additional Responsibilities:
- Performed API and UI testing to ensure functionality and cross-browser compatibility.
- Collaborated with team members to integrate systems, resolve issues, and report project progress.
